AGROGESTA
BRIPO

Coffee and Cocoa Producer and Worldwide Exporter

ECUADOR 2026

AgroGesta BRIPO

Ecuador has a long-standing legacy in both cocoa and coffee. As one of the first cacao-growing regions, it is globally recognized for its fine-flavor beans. Cocoa production blends tradition with modern practices, preserving its cultural roots. Coffee, introduced in the 1860s, thrives in Ecuador's diverse climates and altitudes, producing 100% Arabica. Today, the country is gaining recognition for its qualified coffee, making Ecuador a trusted producer of cocoa and coffee worldwide.

ABOUT COMPANY

AgroGesta BRIPO Cia. Ltda. operates in four strategic locations across Ecuador and Europe. Our main offices are located in the capital, Quito, and in Manta, near the port. We also operate our farm, Finca Valle Dorado, located in Jipijapa at the heart of the production region, where we process our raw materials. Additionally, our warehousing facilities are situated in Manta and Quito, close to Ecuador's key ports, ensuring efficient export logistics. Expanding our international presence, we also maintain a European office and headquarters in Poland, strengthening our connectivity with global clients and partners.

Our product range includes three grades of coffee as well as cocoa. With full control over sourcing, processing, and logistics, we serve clients across global markets.

WHAT WE DO?

AgroGesta BRIPO Cia. Ltda. represents Ecuador's finest cocoa and coffee production with global markets. We work closely with trusted +5000 growers and farms to deliver high-quality green coffee and cocoa beans to clients worldwide. With a strong, transparent supply chain and efficient logistics, we ensure reliable sourcing and consistent quality. Our mission is to create lasting partnerships and expand Ecuador's presence in the international commodity trade.

INTEGRATED AT OUR FACILITIES, RELIABLE AT DESTINATION

THE PROBLEM

Commodity buyers face a fragmented supply chain, dealing with multiple small producers, leading to inefficiencies, inconsistent quality, limited scalability, and high operational costs due to separate handling of processing, storage, and logistics.

OUR SOLUTION

We offer a fully integrated, scalable supply chain from our 150-hectare farm "Finca Valle Dorado" in Jipijapa, Ecuador. With on-site processing and storage, we ensure consistent quality, full traceability, and cost-efficient operations. Our model simplifies sourcing for partners by providing direct access to reliable, high-potential supply.

FINCA VALLE DORADO

OUR FARM

We own 150 hectares of farmland in Jipijapa, Ecuador, demonstrating strong adaptability and soil fertility—laying a solid foundation for future sustainable expansion.

ECUADOR

We are a local farm based in Jipijapa, Ecuador, a region known for its ancestral agricultural heritage. Our goal is to grow sustainably by combining traditional farming knowledge with modern practices.

WHY WORK WITH US?

Consistent Quality & Traceability

We ensure consistent quality and reliable volume through full traceability from farm to export – building trust and long-term partnerships with our clients.

Efficient Supply Chain & Logistics

Strong infrastructure and streamlined logistics are crucial for timely exports. The ability to handle sourcing, processing, storage, and international shipping with reliability adds major value for global clients.

Strong Relationships with Producers

Direct, long-term collaboration with farmers ensures stable supply, better quality control, and ethical sourcing. It also enables flexibility to meet specific client needs—from volume to post-harvest processing.

OUR TEAM

At AgroGesta BRIPO, our strength lies in the people behind the work. Each member of our team is committed to delivering value through professionalism, reliability, and direct communication.

We approach every partnership with care and attention, understanding that lasting business is built on mutual confidence and consistent results.

We work closely with our clients and producers, adapting to specific needs and always aiming to exceed expectations.

Through collaboration and long-term vision, we aim not only to deliver quality products – but to foster meaningful business relationships that grow over time.

INTERNATIONAL TRADE OF COCOA AND COFFEE: THE IMPORTANCE OF SGS CERTIFICATION

SGS certification is a fundamental milestone in the international trade of cocoa and coffee, products renowned for their superior quality. This report explores the certification process in detail, highlighting its significance, scope, benefits, reliability, acquisition, and broader implications for companies operating in the global cocoa and coffee markets.

What is SGS Certification?

SGS is the global leader in inspection, verification, testing, and certification services, recognized for unmatched expertise and reputation in the industry. SGS certification for cocoa and coffee ensures compliance with rigorous international quality and quantity standards, instilling confidence among stakeholders regarding product integrity prior to shipment.

SGS Certification: A Beacon of Assurance

As the worldwide authority in inspection and certification, SGS stands for reliability and excellence. SGS certification guarantees that cocoa and coffee shipments meet strict international standards of quality and quantity, validating product integrity before loading.

AGROGESTA BRIPO'S COMMITMENT AND COOPERATION WITH SGS

AGROGESTA BRIPO fully complies with SGS certification protocols, maintaining a close cooperative partnership to ensure all exported cocoa and coffee shipments meet the highest international standards. This collaboration ensures transparent, efficient, and credible certification processes, reinforcing our commitment to quality, reliability, and global market competitiveness.

Comprehensive Scope of SGS Certification

SGS conducts meticulous evaluations covering both quality and quantity aspects:

- Physicochemical analyses
- Microbiological tests
- Visual inspections
- Weighing and counting

Each element is rigorously assessed to ensure adherence to the highest standards.

Quality Assessment Components

- Physicochemical Analysis: Measurement of parameters such as moisture, color, pH, polarization, and particle size.
- Microbiological Analysis: Tests for total microorganism counts, coliforms, Salmonella, etc.
- Visual Inspection: Thorough examination to confirm absence of impurities, uniform coloration, and optimal granulation.

AGROGESTA BRIPO'S COMMITMENT AND COOPERATION WITH SGS

Key Benefits of SGS Certification

- **Enhanced Quality Assurance:** Builds consumer confidence, reduces risk of claims, and increases market competitiveness.
- **Robust Quantity Assurance:** Prevents financial losses and strengthens supply chain reliability.
- **Market Expansion Opportunities:** Facilitates compliance with international regulations, opening new business avenues.
- **Corporate Image Enhancement:** Demonstrates a strong commitment to quality standards, boosting brand reputation.

Issuance and Reliability of SGS Certification

SGS certification is issued following a comprehensive inspection and product analysis conducted at the port before loading. SGS's distinguished reputation for independence and impartiality, combined with over 140 years of industry experience, enhances the credibility and trustworthiness of its certification services. Additionally, SGS is accredited by multiple international organizations, reinforcing the reliability of its certification.

AGROGESTA BRIPO's collaboration with SGS ensures that every shipment meets these rigorous standards, supporting transparency and operational excellence throughout the export process.
