OUR HERRITAGE

Our story begins in the fertile highlands of southern Ecuador, where the family of **Isauro Moran Serrano** and **Aida O'Brien** cultivated coffee long before modern supply chains connected local producers to international markets. In the region of **Los Vergeles**, known locally as **El Páramo, Pozo Dulce, and Banchal**, coffee was more than a crop. It was the economic heart of the community and a source of pride for the families who dedicated their lives to the land.

For decades, the family managed coffee-growing properties renowned for producing exceptional Arabica coffee. During harvest seasons, workers from surrounding communities joined the fields to pick ripe coffee cherries by hand, continuing traditions that had been passed from one generation to the next. The harvested coffee was carefully prepared and supplied to buyers who recognized the quality of Ecuadorian coffee long before specialty coffee became a global movement.

Growing up surrounded by farming, harvests, and the rhythms of agricultural life, future generations inherited not only the land itself, but also a deep understanding of cultivation, stewardship, and respect for nature. These values became the foundation upon which **AgroGesta BRIPO** was built.

ABOUT COMPANY

ECUADOR - NATIONAL PRODUCTION OPERATIONS:

AGROGESTA BRIPO CÍA. LTDA.

Location: Ecuador

HQ Address: Av. La Coruña 2208, Quito 170135, Ecuador

Main Responsibilities: The company specializes in the cultivation, collection, fermentation, drying and commercialization of green coffee beans ready for export, produced both on its own farm, Finca Valle Dorado (Jipijapa, Manabí), and through a broad national network of more than 5,000 farmers and cooperatives.

AgroGesta BRIPO guarantees consistent quality through agricultural control at origin and the production of regional blends certified by SGS, complying with international standards of volume and traceability.

Ecuador has a long-standing legacy in both cocoa and coffee. As one of the first cacao-growing regions, it is globally recognized for its fine-flavor beans. Cocoa production blends tradition with modern practices, preserving its cultural roots.

Coffee, introduced in the 1860s, thrives in Ecuador's diverse climates and altitudes, producing 100% Arabica. Today, the country is gaining recognition for its qualified coffee, making Ecuador a trusted producer of cocoa and coffee worldwide.

WHAT WE DO?

AgroGesta BRIPO Cia. Ltda. represents Ecuador's finest coffee production in global markets. We work closely with more than 5,000 trusted growers, alongside production from our own farm, to deliver high-quality **green and roasted coffee** to clients worldwide. With a strong, transparent supply chain and efficient logistics, we ensure reliable sourcing and consistent quality. Our mission is to create lasting partnerships, provide exceptional coffee products, and expand Ecuador's presence in the international commodity trade.

INTEGRATED AT OUR FACILITIES, RELIABLE AT DESTINATION

OUR SOLUTION

We offer a fully integrated, scalable supply chain from our 150-hectare farm “Finca Valle Dorado” in Jipijapa, Ecuador. With on-site processing and storage, we ensure consistent quality, full traceability, and cost-efficient operations. Our model simplifies sourcing for partners by providing direct access to reliable, high-potential supply.

FINCA VALLE DORADO

OUR FARM

We are a local farm based in Jipijapa, Ecuador, a region known for its ancestral agricultural heritage. Our goal is to grow sustainably by combining traditional farming knowledge with modern practices.

The People Behind AgroGesta BRIPO

At AgroGesta BRIPO, our strength lies in the people behind the work. Each member of our team is committed to delivering value through professionalism, reliability, and direct communication.

We approach every partnership with care and attention, understanding that lasting business is built on mutual confidence and consistent results. We work closely with our clients and producers, adapting to specific needs and always aiming to exceed expectations.

Through collaboration and long-term vision, we aim not only to deliver quality products - but to foster meaningful business relationships that grow over time.

INTERNATIONAL TRADE OF COFFEE: THE IMPORTANCE OF SGS CERTIFICATION

SGS certification is a fundamental milestone in the international trade of coffee, products renowned for their superior quality. This report explores the certification process in detail, highlighting its significance, scope, benefits, reliability, acquisition, and broader implications for companies operating in the global cocoa and coffee markets.

What is SGS Certification?

SGS is the global leader in inspection, verification, testing, and certification services, recognized for unmatched expertise and reputation in the industry. SGS certification for coffee ensures compliance with rigorous international quality and quantity standards, instilling confidence among stakeholders regarding product integrity prior to shipment.

SGS Certification: A Beacon of Assurance

As the worldwide authority in inspection and certification, SGS stands for reliability and excellence. SGS certification guarantees that cocoa and coffee shipments meet strict international standards of quality and quantity, validating product integrity before loading.

AGROGESTA BRIPO'S COMMITMENT AND COOPERATION WITH SGS

AGROGESTA BRIPO fully complies with SGS certification protocols, maintaining a close cooperative partnership to ensure all exported cocoa and coffee shipments meet the highest international standards. This collaboration ensures transparent, efficient, and credible certification processes, reinforcing our commitment to quality, reliability, and global market competitiveness.

Comprehensive Scope of SGS Certification

SGS conducts meticulous evaluations covering both quality and quantity aspects:

- Physicochemical analyses
- Microbiological tests
- Visual inspections
- Weighing and counting

Each element is rigorously assessed to ensure adherence to the highest standards.

Quality Assessment Components

- Physicochemical Analysis: Measurement of parameters such as moisture, color, pH, polarization, and particle size.
 - Microbiological Analysis: Tests for total microorganism counts, coliforms, Salmonella, etc.
 - Visual Inspection: Thorough examination to confirm absence of impurities, uniform coloration, and optimal granulation.
- 

AGROGESTA BRIPO'S COMMITMENT AND COOPERATION WITH SGS

Key Benefits of SGS Certification

- **Enhanced Quality Assurance:** Builds consumer confidence, reduces risk of claims, and increases market competitiveness.
- **Robust Quantity Assurance:** Prevents financial losses and strengthens supply chain reliability.
- **Market Expansion Opportunities:** Facilitates compliance with international regulations, opening new business avenues.
- **Corporate Image Enhancement:** Demonstrates a strong commitment to quality standards, boosting brand reputation.

Issuance and Reliability of SGS Certification

SGS certification is issued following a comprehensive inspection and product analysis conducted at the port before loading. SGS's distinguished reputation for independence and impartiality, combined with over 140 years of industry experience, enhances the credibility and trustworthiness of its certification services. Additionally, SGS is accredited by multiple international organizations, reinforcing the reliability of its certification.

AGROGESTA BRIPO's collaboration with SGS ensures that every shipment meets these rigorous standards, supporting transparency and operational excellence throughout the export process.

OUR PRODUCTS

At AgroGesta BRIPO, we provide a wide range of premium coffee products to meet diverse market demands. Our portfolio includes high-quality green coffee and roasted coffee beans sourced from Ecuador's finest growing regions. Our products undergo careful processing and strict quality control to ensure consistency and excellence. We proudly serve large-scale operations and international partners worldwide.
